

Is it possible to combat the symptoms of diabetes and lower blood sugar?

A resounding yes! To successfully manage diabetes Chinese herbs can keep blood glucose levels as close to the normal (non-diabetic) range as possible which can prevent the acute and chronic complications associated with the condition. Study's have proved that keeping blood sugar levels as close to normal reduces the risk of developing the major complications of diabetes, and we urge people with diabetes to control not only their blood glucose, but also their blood pressure and cholesterol. This comprehensive management of diabetes is crucial to helping prevent heart attack and stroke.

What exactly is Diabetes?

There are two forms of diabetes: diabetes insipidus, which is caused by failure of the pituitary gland to secrete an antidiuretic hormone (ADH), and diabetes mellitus, a disorder in which the pancreas produces either insufficient amounts of insulin or none at all. In diabetes insipidus, the rarer form of this disease, the failure of the pituitary gland to produce ADH causes the sufferer to experience extreme thirst and pass enormous quantities of urine (ten to forty pints per day), creating a condition known a polyuria.

What are the common symptoms?

Excessive urination and thirst are also symptoms of diabetes mellitus, but to a much lesser degree. Diabetes mellitus, which is the more common form of this disease results from insufficient insulin production, resulting in high blood-sugar levels, degeneration of small blood vessels, and problems with lipid (fat) metabolism. One of the major side effects of diabetes mellitus is poor circulation, especially in the lower extremities (legs and feet), which will cause uncomfortable cramping and sharp pain – a fairly common problem among diabetic patients.

What is the difference between type I and II?

The two types of diabetes mellitus are type I (insulin dependent), the more severe form of this disease, and type II (non-insulin dependent) -- both cause high blood levels of glucose which can cause several problems, including frequent urination, excessive thirst, hunger, fatigue, weight loss, fatigue, nausea, vomiting, pain in the extremities, slow healing infections, blurry vision, and impotency. Sufferers of type I require regular injections of insulin, without which the sufferer eventually lapses into a coma and can die. In type II, insulin is produced by the body, but in insufficient quantities to meet the body's needs. With type II, in most cases insulin-replacement injections are not required; the combination of dietary measures, weight control, and oral medication can keep the condition under control. The onset of type II diabetes is often associated with obesity, and diabetes tends to run in families.

What can Chinese medicine do for diabetics?

With the use of traditional Chinese herbal formulas we are able to improve the health and functioning of the organs (liver, kidneys, pancreas, etc.) that are responsible for insulin production, as well as improve circulation which will provide the patient relief from the discomfort of poor circulation, and end excessive urination and thirst. In time, these formulas will bring the body's blood-sugar levels to optimal readings and in many cases end dependency on insulin injections.

Tell me about the treatment ...

Traditional Chinese medicine's approach to treatment uses a combination of herbal formulas, we use a powerful blood enriching tonic formula [either] Si Wu Tang or Jade Spring Pills, to bring blood-sugar levels to normal levels – plus – we use Tartarian Buckwheat capsules to improve the health and strength of the blood vessels and Liu Wei Di Huang to strengthen the kidneys. This powerful combination will bring the disease under control and provide the user a great deal of relief.

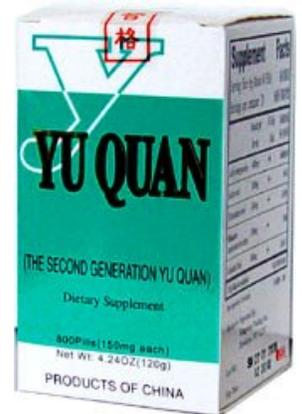

YU QUAN WAN

Jade Spring Pills

This patent formula is a classical prescription that is used for the treatment of diabetes. It successfully treats both diabetes insipidus and mellitus. It uses a combination strong blood enriching herbs: Tian Hua Fen, Ge Gen, Dang Shen, Huang Qi, Fu Ling, Sheng Di Huang, Mai Men Dong, Wu Mei, Wu Wei Zi, and Gan Cao, which generates body fluids, tonifies the Qi and Yin, clears the heat caused by diabetes, as well as alleviate thirst. It comes in bottles of 200 pills, and daily dosage is 8 pills 3 x daily. For more severe cases we can increase dosage.

Cost:

One bottle of pills will last about 8 days and costs **\$12.99** item ~YQW, a 60-day supply is discounted to **\$99.99** item ~YQW8.

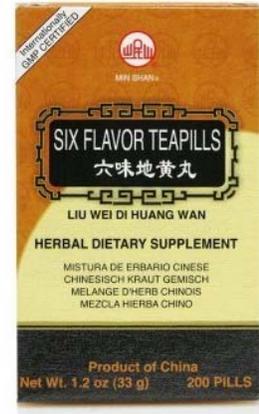

LIU WEI DI HUANG

Liu Wei Di Huang a famous prescription used for strengthening the body resistance, restoring the normal functions of the body, and nourishing and invigorating the kidney yin, and it is used to prevent and treat diabetes.

Liu Wei Di Huang Wan, also known as "Six Flavor Teapills," has helped many people successfully treat "yin deficiency." The Chinese have relied on Liu Wei Di Huang Wan for centuries to tonify and restore yin. It combines blood enriching herbs: rehmannia glutinosa, dioscorea opposita, cornus officinalis, paeonia suffruticosa, poria cocos, and alisma plantago aquatica. This formula comes either in the raw form (meaning you'll need to prepare a tea and drink 4 ounces 3 x daily) or in easy-to-use pill form (dose would be 8 pills 3 x day).

Cost:

One batch of raw herbs is **\$19.99** and will last about 15 days item ~LWDH; a 60-day supply is discounted to **\$74.99** item ~LWDH60. Or, one bottle of pills will last about 8 days and costs **\$9.95** item ~LWDHPF, a 60-day supply is discounted to **\$74.99** item ~LWDHPF60.

TARTARIAN BUCKWHEAT CAPSULES

Ku Qiao Mai

This amazingly effective one herb formula contains fagopyrum tartaricum root [aka: tartarian buckwheat] and is used to improve glucose metabolism and will benefit diabetes by improving the health of blood vessels. Within just a short period of time, users of this formula swear by its ability to reduce the discomfort and pain in their lower extremities. Continuous use of this formula will improve the health of the arteries and veins benefiting insulin production, as well as reducing cholesterol and lowering blood pressure. Recommended daily dosage is 3 capsules 3 x daily.

Cost:

One bottle of pills will last about 15 days and costs **\$22.99** item ~TBW, a 60-day supply is discounted to **\$89.99** item ~TBW4.

When can you realistically expect relief?

Ideally speaking, within a few days of beginning treatment we expect the combined use of the three formulas to address diabetes symptoms, enough so that you can begin switching over from Western medications to using just these 3 herbal products. Within three-four weeks of use, we anticipate you will be able to depend solely on these herbal products and will have noticed a major change in your symptoms.

Although, the health benefits of using this treatment approach are well known among Chinese herbalists and doctors of traditional Chinese medicine, their fame arises out of their ability to invigorate the pancreas, strengthen the functioning of the kidneys, increase vital energy, and enable the user to live a longer healthier life. Perhaps, you owe it to yourself to try this treatment plan?

If you'd like to know more about diabetes formulas, or if you would like to purchase, please give us a call or send an email. We look forward to hearing from you. To gain access to these products on our website, click: <http://seaofchi.com/General%20Health-270/Diabetes-279>
